Appl. No. 10/002,346

Request for Continued Examination dated April 15, 2004

Response to Final Office Action of October 16, 2003

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended.) A plastic bucket comprising, in combination:

an upright, annular bucket wall having a centerline axis and an inside wall radius, said

annular bucket wall integrally connected to and formed with an annular lip to provide an open

bucket mouth, said annular lip comprising a first single and sole, diagonal path annular wall

portion extending upwardly and inwardly from said annular bucket wall in a direction radially

inwardly toward said center line axis of the annular bucket wall along a diagonal path to an

upper end of said annular wall portion, said annular lip further comprising a first vertical wall

section extending from said upper end of said diagonal path section in an upright vertical

direction generally parallel to the annular bucket wall axis, said first vertical wall section having

an outside radius and an inside radius from said axis, said outside radius less than said inside

wall radius of said annular bucket wall, said annular lip also comprising a vertical rim generally

parallel to said first vertical wall section and having an inside rim wall and an outside rim wall,

the outside rim wall having a radius less than said inside wall radius of said annular bucket wall

and greater than the outside radius of said first vertical wall section; and a single, horizontal,

annular flange section of said annular lip extending radially outward from the axis and integrally

joining the first vertical wall section and the vertical rim.

2. (Cancelled.)

Appl. No. 10/002,346

Request for Continued Examination dated April 15, 2004

Response to Final Office Action of October 16, 2003

3. (Previously Amended.) A plastic bucket as defined in claim 1 where no internal

ribs are formed on said annular lip.

4. (Previously Amended.) A plastic bucket as defined in claim 1 where the angle

between said diagonal path and the vertical direction does not exceed approximately 45 degrees

with respect to the axis.

5. (Previously Cancelled.)

6. (Previously Cancelled.)

7. (Previously Cancelled.)

8. (Original.) A plastic bucket as defined in claim 1 where the magnitude of radially

inward extent of said annular wall portion is controlled to permit said bucket to be molded

without the use of a collapsible mold core.

9. (Previously Amended.) The combination of claim 1 wherein said horizontal

annular flange extends radially beyond said vertical rim outside wall.
